Subject: Administrative Stay / Questions
Date: Tuesday, November 18, 2014 12:48:00 PM

Regarding your questions about a possible Administrative Stay, for Hydrogen Sulfide & Methyl Mercaptan, when the RMP List rule first came out ~ 1994. Bryant contacted Jim Belke and asked for information about this. Jim was not aware of this and made some calls at HQ. Belke said that Craig Matthiessen and John Averback, worked on the rule and both were confident there were no stays on these chemicals. John thought that someone may be confusing a stay from the MACT rules.

Dupont has not provided EPA with the amount of Methyl Mercaptan on site at the time of the incident...will forward to you as soon as we have answer. susan
